

GUIDELINES TO USE CORRECTLY LUMINOUS FIBER OPTICAL FABRIC

Don't fold

The fabric must be always rolled and handle with caution. Eventual folds can damage irreversibly the fabric, creating luminous folds or the breaking of the optical fiber.

Don't wash the fabric, in order to clean eventual stains, dab gently the surface with a not abrasive glove and neutral soap.

Don't iron, not get it close to hot sources.

Don't dry clean.

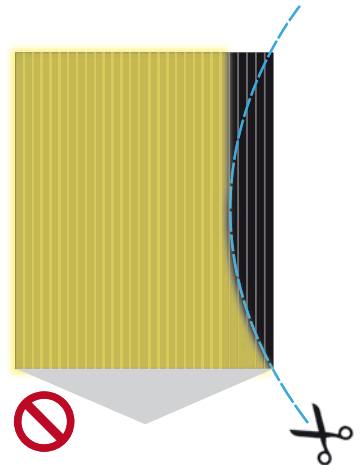

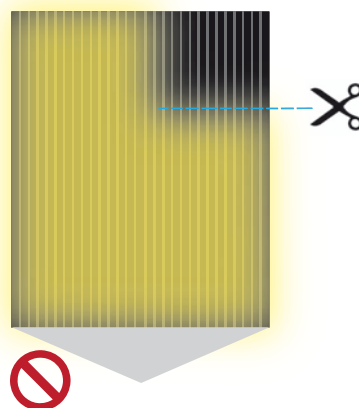

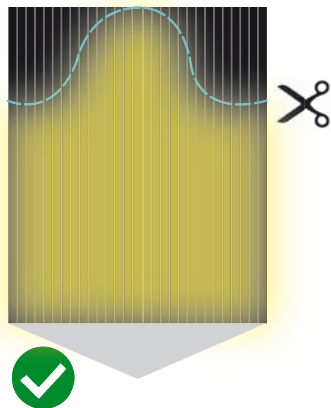

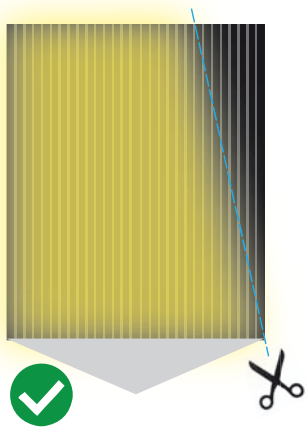

Don't bleach.

INDICATION FOR CUT THE FABRIC

Eventual luminous shapes or darker areas should not be considered a defect but an esteem of the craftsmanship.

To fit at the waist the fabric don't cut it, use modelling with a gripper.

It's not possible to create rounded cut.
